### **Mediating Languages and Cultures (Multilingual Matters)** From Multilingual Matters

The history of "language teaching" is shot through with methods and approaches to language learning - most recently with "communicative language teaching" - but this book demonstrates that a more differentiated and richer understanding of learning a foreign language is both necessary and desirable. Languages and cultures are interlinked and interdependent and their teaching and learning should be too. Learning another language is part of a complex process of learning and understanding other people's ways of life, ways of thinking and socio-economic experience.
