OpenCV 2 Computer Vision Application Programming Cookbook By Robert Laganière

This is a cookbook that shows results obtained on real images with detailed explanations and the relevant screenshots. The recipes contain code accompanied with suitable explanations that will facilitate your learning. If you are a novice C++ programmer who wants to learn how to use the OpenCV library to build computer vision applications, then this cookbook is appropriate for you. It is also suitable for professional software developers wishing to be introduced to the concepts of computer vision programming. It can be used as a companion book in university-level computer vision courses. It constitutes an excellent reference for graduate students and researchers in image processing and computer vision. The book provides a good combination of basic to advanced recipes. Basic knowledge of C++ is required.

Editorial Review

About the Author

Robert Laganière is a professor at the University of Ottawa, Canada. He received his Ph.D. degree from INRS-Telecommunications in Montreal in 1996. Dr. Laganière is a researcher in computer vision with an interest in video analysis, intelligent visual surveillance, and imagebased modeling. He is a co-founding member of the VIVA research lab. He is also a Chief Scientist at iWatchLife.com, a company offering a cloud-based solution for remote monitoring. Dr. Laganière is the co-author of Object-oriented Software Engineering published by McGraw Hill in 2001. Visit the author's website at <http://www.laganiere.name>.

Users Review

From reader reviews:

Jane Cuellar:

In this 21st one hundred year, people become competitive in every way. By being competitive right now, people have to do something to make these survive, being in the middle of the actual crowded place and notice by means of surrounding. One thing that sometimes many people have underestimated it for a while is reading. Yes, by reading a guide your ability to survive raise then having chance to stay than other is high. For you personally who want to start reading a new book, we give you this particular OpenCV 2 Computer Vision Application Programming Cookbook book as starter and daily reading reserve. Why, because this book is usually more than just a book.

Melissa Jackson:

Do you one of people who can't read enjoyable if the sentence chained within the straightway, hold on guys that aren't like that. This OpenCV 2 Computer Vision Application Programming Cookbook book is readable by means of you who hate the perfect word style. You will find the facts here are arranged for enjoyable studying experience without leaving possibly decrease the knowledge that want to deliver to you. The writer of OpenCV 2 Computer Vision Application Programming Cookbook content conveys objective easily to understand by most people. The printed and e-book are not different in the information but it just different available as it. So, do you even now thinking OpenCV 2 Computer Vision Application Programming Cookbook is not loveable to be your top record reading book?

Rachel Chaney:

Information is provisions for anyone to get better life, information currently can get by anyone from everywhere. The information can be an expertise or any news even a concern. What people must be consider any time those information which is from the former life are hard to be find than now is taking seriously which one is suitable to believe or which one the particular resource are convinced. If you receive the unstable resource then you buy it as your main information we will see huge disadvantage for you. All of those possibilities will not happen with you if you take OpenCV 2 Computer Vision Application

Programming Cookbook as the daily resource information.

Ronald Kleiman:

Hey guys, do you want to find a new book to study? Maybe the book with the title OpenCV 2 Computer Vision Application Programming Cookbook suitable to you? The particular book was written by a famous writer in this era. Typically the book titled OpenCV 2 Computer Vision Application Programming Cookbook is the one of several books that everyone reads now. This specific book was inspired a lot of people in the world. When you read this review you will enter the new dimensions that you have never known before. The author explained their thought in a simple way, so all of people can easily know the core of this publication. This book will give you a wide range of information about this world now. To help you to see the representation of the world on this book.
