Philosophy of Science: A Contemporary Introduction (Routledge Contemporary Introductions to Philosophy) By Alex Rosenberg

Any serious student attempting to better understand the nature, methods and justification of science will value Alex Rosenberg's updated and substantially revised *Third Edition* of *Philosophy of Science: A Contemporary Introduction*. Weaving together lucid explanations and clear analyses, the volume is a much-used, thematically oriented introduction to the field.

New features of the *Third Edition* include more coverage of the history of the philosophy of science, more fully developed material on the metaphysics of causal and physical necessity, more background on the contrast between empiricism and rationalism in science, and new material on the structure of theoretical science (with expanded coverage of Newtonian and Darwinian theories and models) and the realism/antirealism controversy. Rosenberg also divides the *Third Edition* into fifteen chapters, aligning each chapter with a week in a standard semester-long course. Updated Discussion Questions, Glossary, Bibliography and Suggested Readings lists at the end of each chapter will make the *Third Edition* indispensable, either as a comprehensive stand-alone text or alongside the many wide-ranging collections of articles and book excerpts currently available.

Editorial Review

Review

"Written with verve and panache, Alex Rosenberg's Third Edition is a great introduction to perennial questions in the philosophy of science. For students, Rosenberg's book will be an accessible and thought-provoking guide; for their teachers, it will be an indispensable resource." –*Marc Lange, University of North Carolina, Chapel Hill*

"Alex Rosenberg's Third Edition has been completely reorganized and augmented with lots of fascinating new material emphasizing the connections between philosophy of science and the rest of philosophy. Challenging and insightful, this is one of the best single-author texts in the field. I'm sure it will be even more successful than its predecessor."–*Martin Curd, Purdue University*

About the Author

Alex Rosenberg is R. Taylor Cole Professor of Philosophy at Duke University.

Users Review

From reader reviews:

Henry Robinson:

Spent a free a chance to be fun activity to try and do! A lot of people spent their free time with their family, or their friends. Usually they carrying out activity like watching television, gonna beach, or picnic in the park. They actually doing same every week. Do you feel it? Will you something different to fill your personal free time/ holiday? Could be reading a book might be option to fill your no cost time/ holiday. The first thing that you will ask may be what kinds of book that you should read. If you want to try out look for book, may be the publication untitled Philosophy of Science: A Contemporary Introduction (Routledge Contemporary Introductions to Philosophy) can be very good book to read. May be it may be best activity to you.

David Rivera:
