

Apache Solr 4 Enterprise Search Server - Third Edition

By David Smiley, Eric Pugh, Kranti Parisa, Matt Mitchell

Apache Solr 4 Enterprise Search Server - Third Edition By David Smiley, Eric Pugh, Kranti Parisa, Matt Mitchell

If you are a developer who wants to learn how to get the most out of Solr in your applications, whether you are new to the field of search or have used Solr but don't know everything or simply want a good reference, this book is ideal for you. It would be helpful to have some familiarity with basic programming concepts, but no prior experience is required.

Editorial Review

About the Author

Born to code, David Smiley is a software engineer who's passionate about search, Lucene, spatial, and open source. He has a great deal of expertise with Lucene and Solr, which started in 2008 at MITRE. In 2009, as the lead author, along with the coauthor Eric Pugh, he wrote Solr 1.4 Enterprise Search Server, the first book on Solr, published by Packt Publishing. It was updated in 2011, Apache Solr 3 Enterprise Search Server, Packt Publishing, and again for this third edition. After the first book, he developed 1- and 2-day Solr training courses, delivered half a dozen times within MITRE, and he has also delivered training on LucidWorks once. Most of his excitement and energy relating to Lucene is centered on Lucene's spatial module to include Spatial4j, which he is largely responsible for. He has presented his progress on this at Lucene Revolution and other conferences several times. He currently holds the status of committer & Project Management Committee (PMC) member with the Lucene/Solr open source project. Over the years, David has staked his career on search, working exclusively on such projects, formerly for MITRE and now as an independent consultant for various clients. You can reach him at dsmiley@apache.org and view his LinkedIn profile here: <http://www.linkedin.com/in/davidwsmiley>. Fascinated by the "craft" of software development, Eric Pugh has been involved in the open source world as a developer, committer, and user for the past decade. He is an emeritus member of the Apache Software Foundation. In biotech, financial services, and defense IT, he has helped European and American companies develop coherent strategies to embrace open source software. As a speaker, he has advocated the advantages of Agile practices in search, discovery, and analytics projects. Eric became involved in Solr when he submitted the patch SOLR-284 to parse rich document types, such as PDF and MS Office formats, that became the single-most popular patch, as measured by votes! The patch was subsequently cleaned up and enhanced by three other individuals, demonstrating the power of the free / open source models to build great code collaboratively. SOLR-284 was eventually refactored into Solr Cell. He blogs at <http://www.opensourceconnections.com/blog/>. Kranti Parisa has more than a decade of software development expertise and a deep understanding of open source, enterprise software, and the execution required to build successful products. He has fallen in love with enterprise search technologies, especially Lucene and Solr, after his initial implementations and customizations carried out in early 2008 to build a legal search engine for bankruptcy court documents, docket entries, and cases. He is an active contributor to the Apache Solr community. One of his recent contributions, along with Joel Bernstein, SOLR-4787, includes scalable and nested join implementations. Kranti is currently working at Apple. Prior to that, he worked as a lead engineer and search architect at Comcast Labs, building and supporting a highly scalable search and discovery engine for the X1/X2 platform-the world's first entertainment operating system. An entrepreneur by DNA, he is the cofounder and technical advisor of multiple start-ups focusing on cloud computing, SaaS, big data, and enterprise search based products and services. He holds a master's degree in computer integrated manufacturing from the National Institute of Technology, Warangal, India. You can reach him on LinkedIn: <http://www.linkedin.com/in/krantiparisa>. Matt Mitchell studied music synthesis and performance at Boston's Berklee College of Music, but his experiences with computers and programming in his younger years inspired him to pursue a career in software engineering. A passionate technologist, he has worked in many areas of software development, is active in several open source communities, and now has over 15 years of professional experience. He had his first experiences with Lucene and Solr in 2008 at the University of Virginia Library, where he became a core contributor to an open source search platform called Blacklight. Matt is the author of many open source projects, including a Solr client library called RSolr, which has had over 1 million downloads from rubygems.org. He has been responsible for the design and implementation of search systems at several tech companies, and he is currently a senior member of the engineering team at

LucidWorks, where he's working on a next generation search, discovery, and analytics platform. You can contact Matt on LinkedIn at <https://www.linkedin.com/in/mattmitchell4>.

Users Review

From reader reviews:

Willie Blackburn:

Apache Solr 4 Enterprise Search Server - Third Edition can be one of your beginner books that are good idea. We all recommend that straight away because this publication has good vocabulary which could increase your knowledge in vocabulary, easy to understand, bit entertaining but nonetheless delivering the information. The writer giving his/her effort to place every word into joy arrangement in writing Apache Solr 4 Enterprise Search Server - Third Edition but doesn't forget the main position, giving the reader the hottest and based confirm resource data that maybe you can be certainly one of it. This great information could drawn you into completely new stage of crucial contemplating.

Robert Qualls:

Do you one of the book lovers? If so, do you ever feeling doubt if you find yourself in the book store? Attempt to pick one book that you just dont know the inside because don't determine book by its include may doesn't work at this point is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside look likes. Maybe you answer may be Apache Solr 4 Enterprise Search Server - Third Edition why because the amazing cover that make you consider in regards to the content will not disappoint anyone. The inside or content is definitely fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.

Jack Michaud:

Reserve is one of source of information. We can add our knowledge from it. Not only for students but in addition native or citizen have to have book to know the upgrade information of year to help year. As we know those guides have many advantages. Beside we add our knowledge, may also bring us to around the world. By the book Apache Solr 4 Enterprise Search Server - Third Edition we can take more advantage. Don't someone to be creative people? To become creative person must prefer to read a book. Merely choose the best book that suited with your aim. Don't always be doubt to change your life with this book Apache Solr 4 Enterprise Search Server - Third Edition. You can more pleasing than now.

Sondra Spencer:

Reading a e-book make you to get more knowledge from it. You can take knowledge and information originating from a book. Book is prepared or printed or created from each source this filled update of news. With this modern era like now, many ways to get information are available for an individual. From media social such as newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just looking for the Apache Solr 4 Enterprise Search Server - Third Edition when you essential it?
