Editorial Review

About the Author

Marge Lial (late) became interested in math at an early age—it was her favorite subject in the first grade! Marge's intense desire to educate both her students and herself inspired the writing of numerous best-selling textbooks. Marge, who received Bachelor's and Master's degrees from California State University at Sacramento, was affiliated with American River College. An avid reader and traveler, her travel experiences often found their way into her books as applications, exercise sets, and feature sets. She was particularly interested in archeology; trips to various digs and ruin sites produced some fascinating problems for her textbooks involving such topics as the building of Mayan pyramids and the acoustics of ancient ball courts in the Yucatan. We dedicate the new editions of the paperback developmental math series to Marge in honor of her contributions to the field in which she helped thousands of students succeed.

When **John Hornsby** enrolled as an undergraduate at Louisiana State University, he was uncertain whether he wanted to study mathematics education or journalism. His ultimate decision was to become a teacher, but after twenty-five years of teaching at the high school and university levels and fifteen years of writing mathematics textbooks, both of his goals have been realized. His love for both teaching and for mathematics is evident in his passion for working with students and fellow teachers as well. His specific professional interests are recreational mathematics, mathematics history, and incorporating graphing calculators into the curriculum. John's personal life is busy as he devotes time to his family (wife Gwen, and sons Chris, Jack, and Josh). He has been a rabid baseball fan all of his life. John's other hobbies include numismatics (the study of coins) and record collecting. He loves the music of the 1960s and has an extensive collection of the recorded works of Frankie Valli and the Four Seasons.

A native Midwesterner, **Terry McGinnis** received her Bachelor's of Science in Elementary Education with a concentration in Mathematics from Iowa State University. She has taught elementary and middle school mathematics, and developed and implemented the curriculum used with her students. Terry has been involved in college mathematics publishing for over 20 years, working with a variety of authors on textbooks in developmental mathematics and precalculus. After working behind the scenes on many of the Lial/Hornsby textbooks and supplements for over 10 years, Terry joined Margaret Lial and John Hornsby in 2002 as coauthor of their developmental mathematics series that includes *Introductory Algebra*, *Intermediate Algebra*, and *Introductory and Intermediate Algebra*. When not working, Terry enjoys spinning at a local health club, walking, and reading fiction. She is the devoted mother of two sons, Andrew and Tyler.

Diana Hestwood lives in Minnesota and has taught at Metropolitan Community College in Minneapolis for two decades. She has done research on the student brain and is an expert on study skills. She is the author of Lial/Hestwood's *Prealgebra* and coauthor of Lial/Salzman/Hestwood's *Basic Math* and Lial/Hestwood/Hornsby/McGinnis's *Prealgebra and Introductory Algebra*.

Stan Salzman is a long time resident of Sacramento, California. Stan has taught at American River College for many years, where he was a member of the business department. He is the author of *Business Math* and *Essential Math*, published by Pearson Education, Inc., and is coauthor of *Basic Math*.

Users Review

From reader reviews:

Brandy Hagaman:

Reading a book to become new life style in this year; every people loves to go through a book. When you examine a book you can get a lot of benefit. When you read textbooks, you can improve your knowledge, mainly because book has a lot of information into it. The information that you will get depend on what forms of book that you have read. If you want to get information about your review, you can read education books, but if you act like you want to entertain yourself look for a fiction books, this sort of us novel, comics, and soon. The Developmental Mathematics: Basic Mathematics and Algebra (3rd Edition) provide you with a new experience in looking at a book.

Kelsey Dehart:

This Developmental Mathematics: Basic Mathematics and Algebra (3rd Edition) is brand new way for you who has intense curiosity to look for some information mainly because it relief your hunger info. Getting deeper you on it getting knowledge more you know or perhaps you who still having little bit of digest in reading this Developmental Mathematics: Basic Mathematics and Algebra (3rd Edition) can be the light food to suit your needs because the information inside this book is easy to get by anyone. These books create itself in the form and that is reachable by anyone, yep I mean in the e-book web form. People who think that in book form make them feel sleepy even dizzy this publication is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss that! Just read this e-book kind for your better life in addition to knowledge.

Edward Baca:

Within this era which is the greater person or who has ability to do something more are more important than other. Do you want to become considered one of it? It is just simple strategy to have that. What you are related is just spending your time almost no but quite enough to get a look at some books. One of many books in the top listing in your reading list is usually Developmental Mathematics: Basic Mathematics and Algebra (3rd Edition). This book that is qualified as The Hungry Mountains can get you closer in becoming precious person. By looking upward and review this guide you can get many advantages.

Kimberly Wheatley:

You will get this Developmental Mathematics: Basic Mathematics and Algebra (3rd Edition) by visit the bookstore or Mall. Only viewing or reviewing it can to be your solve trouble if you get difficulties on your knowledge. Kinds of this book are various. Not only by simply written or printed but can you enjoy this book simply by e-book. In the modern era just like now, you just looking by your local mobile phone and searching what your problem. Right now, choose your current ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose suitable ways for you.
