The Columbia Guide to Modern Chinese History By R. Keith Schoppa

China, the world's oldest and most populous state, remains an enigma to most people in the West, even at a time when that country is playing an increasingly prominent role on the international stage. At the heart of modern Chinese history have been the efforts of the Chinese people to transform their polity into a modern nation state, the Confucian orthodoxy into an ideology that can help direct that process, and an agrarian economy into an industrial one. These efforts are ongoing and of great importance.

This book is both an introduction to the major features of modern Chinese history and a resource for researchers interested in virtually any topic relating to the Chinese experience of the last 220 years. This valuable reference contains:

- a historical narrative providing a comprehensive overview of five core aspects of Chinese history: domestic politics, society, the economy, the world of culture and thought, and relations with the outside world;
- a compendium of 250 short, descriptive articles on key figures, events, and terms;
- a resource guide containing approximately 500 annotated entries for the most authoritative sources for further research in English, as well as descriptions of important films depicting modern China and a guide to electronic resources; and
- appendices, including a chronology, excerpts from key primary source documents, and a wealth of tables and graphs on demographic, social, and economic trends.

Editorial Review

Review

Schoppa's guide to Chinese history since 1770 is a short but surprisingly useful beginner's research tool... [his] book should be in the reference sections of high school as well as college libraries and may be useful as a text in Chinese politics courses.

As a pupil, I exactly feel bored in order to read. If their teacher inquired them to go to the library as well as to make a summary for some publication, they are complained. Just little students that have reading's spirit or real their leisure activity. They just do what the teacher wants, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring in addition to can't see colorful images on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this period, many ways to get whatever we would like. Likewise, word says, many ways to reach Chinese's country.
