Five Minds for the Future (Leadership for the Common Good) By Howard Gardner

We live in a time of relentless change. The only thing that's certain is that new challenges and opportunities will emerge that are virtually unimaginable today. How can we know which skills will be required to succeed?

In *Five Minds for the Future*, bestselling author Howard Gardner shows how we will each need to master "five minds" that the fast-paced future will demand:

- The disciplined mind, to learn at least one profession, as well as the major thinking (science, math, history, etc.) behind it
- The synthesizing mind, to organize the massive amounts of information and communicate effectively to others
- The creating mind, to revel in unasked questions—and uncover new phenomena and insightful apt answers
- The respectful mind, to appreciate the differences between human beings - and understand and work with all persons
- The ethical mind, to fulfill one's responsibilities as both a worker and a citizen

Without these "minds," we risk being overwhelmed by information, unable to succeed in the workplace, and incapable of the judgment needed to thrive both personally and professionally.

Complete with a substantial new introduction, *Five Minds for the Future* provides valuable tools for those looking ahead to the next generation of leaders - and for all of us striving to excel in a complex world.

Howard Gardner—cited by Foreign Policy magazine as one of the one hundred most influential public intellectuals in the world, and a MacArthur Fellowship recipient—is the Hobbs Professor of Cognition and Education at the Harvard Graduate School of Education.

Editorial Review

From Publishers Weekly

Starred Review. Psychologist, author and Harvard professor Gardner (Multiple Intelligences: New Horizons) has put together a thought-provoking, visionary attempt to delineate the kinds of mental abilities ("minds") that will be critical to success in a 21st century landscape of accelerating change and information overload. Gardner's five minds-disciplined, synthesizing, creating, respectful and ethical-are not personality types, but ways of thinking available to anyone who invests the time and effort to cultivate them: "how we should use our minds." In presenting his "values enterprise," Gardner uses a variety of explanatory models, from developmental psychology to group dynamics, demonstrating their utility not just for individual development, but for tangible success in a full range of human endeavors, including education, business, science, art, politics and engineering. A tall order for a single work, Gardner avoids overly-technical arguments as well as breezy generalizations, putting to fine use his twenty years experience as a cognitive science researcher, author and educator, and proving his world-class reputation well-earned. Though specialists might wish Gardner dug a bit more into the research, most readers will find the book lively and engaging, like the fascinating lectures of a seasoned, beloved prof.

Review

"...a detailed and thoughtful description of the multifaceted brains that are likely to be most valued in the coming decades." --BusinessWeek, May 7, 2007

From the Back Cover

The world of the future will demand capacities that, until now, have been mere options. Have you begun developing those capacities-in yourself and others?

We live in a time of vast changes that include accelerating globalization, mounting quantities of information, the growing hegemony of science and technology, and the clash of civilizations. Those changes call for new ways of learning and thinking in school, business and the professions. In *Five Minds for the Future*, noted psychologist Howard Gardner defines the cognitive abilities that will command a premium in the years ahead:

the ethical mind-fulfillment of one's responsibilities as a worker and a citizen Armed with these well-honed capacities, a person will be equipped to deal with what is expected in the future-as well as what cannot be anticipated. Without these "minds", individuals will be at the mercy of forces they can't understand-overwhelmed by information, unable to succeed in the workplace, and incapable of making judicious decisions about personal and professional manners. Renowned worldwide for his theory of multiple intelligences, Gardner takes that thinking to the next level in this book. Concise and engaging, *Five Minds for the Future* will inspire lifelong learning in any reader and provide valuable insights for those charged with training and developing organizational leaders-today *and* tomorrow. Users Review **From reader reviews:**

Nelson Gendron: Reading a book can be one of a lot of activity that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoyed. First reading a publication will give you a lot of new details. When you read a publication you will get new information mainly because book is one of several ways to share the information or their idea. Second, reading through a book will make you more imaginative. When you studying a book especially fictional book the author will bring you to imagine the

story how the characters do it anything. Third, you could share your knowledge to others. When you read this Five Minds for the Future (Leadership for the Common Good), you may tell your family, friends as well as soon about your guide. Your knowledge can inspire different ones, make them reading a publication. Paul Douglas: Spent a free the perfect time to be fun activity to perform! A lot of people spent their down time with their family, or their very own friends. Usually they performing activity like watching television, going to beach, or picnic in the park. They actually doing same every week. Do you feel it? Do you need to something different to fill your personal free time/ holiday? Might be reading a book could be option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of reserve that you should read. If you want to test look for book, may be the e-book untitled Five Minds for the Future (Leadership for the Common Good) can be fine book to read. May be it can be best activity to you.

Scott Hicks: People live in this new day of lifestyle always try to and must have the time or they will get large amount of stress from both everyday life and work. So, if we ask do people have spare time, we will say absolutely of course. People is human not just a robot. Then we request again, what kind of activity do you possess when the spare time coming to you actually of course your answer will probably unlimited right. Then ever try this one, reading guides. It can be your alternative throughout spending your spare time, the actual book you have read is actually Five Minds for the Future (Leadership for the Common Good).

John Wiser: A lot of guide has printed but it takes a different approach. You can get it by net on social media. You can choose the very best book for you, science, amusing, novel, or whatever by means of searching from it. It is known as of book Five Minds for the Future (Leadership for the Common Good). Contain your knowledge by it. Without leaving behind the printed book, it could add your knowledge and make you actually happier to read. It is most significant that, you must aware about e-book. It can bring you from one location to other place.
