Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) From Springer

This groundbreaking resource offers a comprehensive overview of cutting-edge video-based eye monitoring algorithms, as well as human factor algorithms and experiments. Helping to apply the skills in Intelligent Human Machine Interaction (IHMI), this practical reference shows how the core low-level building blocks are implemented and how they are linked with human factor algorithms and human-machine interfaces (HMI) in smart vehicles, sensitive environments and medical facilities.

Editorial Review

From the Back Cover

This practical reference provides you a comprehensive in-depth coverage of both theory and practice of cutting-edge Passive Eye (-Gaze) Monitoring technology. It describes and examines vision algorithms, Human Factors methodologies, and hardware build in eye-gaze monitoring systems designed for various real-world applications, along with practical issues, including performance on experimental subjects, real-time measurements, and user calibration, feedback and acceptance. It helps you to understand the motivations, activities, trends and directions of researchers and engineers in Intelligent Human Machine Interaction and Eye Tracking in today's market, and offers you a view of the future of this rapidly evolving technological area.

The book offers you a detailed description of vision algorithms and core building-blocks of a video-based eye tracking system (parts I and II), including: automatic detection of human eyes in videos, modeling the eyes' structure and appearance, tracking of spatial eye coordinates, identifying pupil, iris, eyelids, and eye-corners locations, estimating, calibrating and tracking a person's gaze direction, as well as interpreting and reconstructing displayed worlds' images on the eye's cornea. Part III through VI of this book provide a detailed coverage of recent successful use of eye monitoring systems, either as an interaction input device or a reliable source of data, in advanced applications including automotive, military, medicine, information security and retrieval, typing and reading, online search, marketing, gaze-contingent displays, augmented and virtual reality, and video gaming. Part III is on "Gaze-Based Interactions" and contains three chapters. Part IV includes two chapters on applications of eye monitoring in military and security realms. Part V presents recent deployment of the technology in automotive and medicine. The last part is on "Eye Monitoring in Information Retrieval and Interface Design Assessment".

Users Review

From reader reviews:

Sandra Yunker:

The book Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) make one feel enjoy for your spare time. You can utilize to make your capable a lot more increase. Book can to become your best friend when you getting anxiety or having big problem with the subject. If you can make reading through a book Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) to be your habit, you can get considerably more advantages, like add your current capable, increase your knowledge about some or all subjects. It is possible to know everything if you like available and read a e-book Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology). Kinds of book are several. It means that, science e-book or encyclopedia or other individuals. So , how do you think about this guide?

Ruby Pritchett:

The particular book Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) will bring one to the new experience of reading any book. The author style to describe the idea is very unique. When you try to find new book to study, this book very ideal to you. The book Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) is much recommended to you to see. You can also get the e-book in the official web site, so you can quickly to read the book.

Hazel Reinoso:

Do you like reading a publication? Confuse to looking for your preferred book? Or your book has been rare? Why so many question for the book? But any kind of people feel that they enjoy intended for reading. Some people likes reading through, not only science book but also novel and Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) or maybe others sources were given knowledge for you. After you know how the great a book, you feel want to read more and more. Science reserve was created for teacher or even students especially. Those books are helping them to add their knowledge. In additional case, beside science reserve, any other book likes Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) to make your spare time far more colorful. Many types of book like this.

Kim Deyoung:

Reading a guide make you to get more knowledge from that. You can take knowledge and information from a book. Book is written or printed or descriptive from each source this filled update of news. On this modern era like currently, many ways to get information are available for an individual. From media social like newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just in search of the Passive Eye Monitoring: Algorithms, Applications and Experiments (Signals and Communication Technology) when you essential it?
