Teaching, Learning and Research in Higher Education: A Critical Approach By Mark Tennant, Cathi McMullen, Dan Kaczynski

Teaching, Learning and Research in Higher Education offers a combination of critical perspectives and practical advice that is ideally suited for individuals interested in enhancing their practice through analysis and critique. The aim is to promote a critical understanding of one's own practices: to foster personal and professional formation through a reflexive engagement with one's environment and circumstances. At a practical level this means to continuously think about how to adjust practice rather than following a formulaic approach derived from any particular educational theory.

Teaching, Learning and Research in Higher Education argues that academics can find space for their own agency in the midst of institutional policies and practices that serve to frame, as well as delimit and constrain, what counts as good academic work in teaching and research. This text bridges a gap between those books that provide a high-level analysis of contemporary higher education, the more practical texts on how to be a good teacher in higher education, and those texts which aim to improve teaching through better understanding of the learning process.

Topical chapters include:

Teacher-learner relationship, Learning groups, Practice-oriented learning, Teaching for diversity, e-learning, Assessment, Approaches to Staff Development, Quality assurance, Supervision and Research education, Doing research, and Teaching & Research.

A must-have resource for higher education professions, academic developers, professionals, and anyone looking to improve their teaching and learning practices, Teaching, Learning and Research in Higher Education is also appropriate for continuing and professional development courses in the UK and teaching and learning courses in the US.

Mark Tennant is Dean of the University Graduate School, University of Technology, Sydney.

Cathi McMullen is Lecturer in the School of Marketing and Management at Charles Sturt University.

Dan Kaczynski is Professor in the Educational Leadership department at Central Michigan University.

Editorial Review

Review

"The role of universities in today's world and how they relate?or should relate?to governments, economies, communities, and industries is the subject of wide debate. The outcomes of that debate will influence the working lives of academics. Rather than passively await those outcomes, *Teaching, Learning, and Research in Higher Education: A Critical Approach* inspires academics to become agents of change. The book provides concrete suggestions and encouragement for how academics might "catch up" and prosper in this new reality."

Users Review

From reader reviews:

Ethel Ellis:

Now a day people that Living in the era exactly where everything reachable by connect with the internet and the resources inside it can be true or not involve people to be aware of each data they get. How many people to be smart in acquiring any information nowadays? Of course the answer then is reading a book. Reading a book can help individuals out of this uncertainty Information especially this Teaching, Learning and Research in Higher Education: A Critical Approach book as this book offers you rich data and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it as you know.

Roy Larson:

Why? Because this Teaching, Learning and Research in Higher Education: A Critical Approach is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will distress you with the secret it inside. Reading this book adjacent to it was fantastic author who else write the book in such amazing way makes the content interior easier to understand, entertaining way but still convey the meaning totally. So , it is good for you for not hesitating having this any longer or you going to regret it. This excellent book will give you a lot of rewards than the other book possess such as help improving your proficiency and your critical thinking method. So , still want to hesitate having that book? If I ended up you I will go to the guide store hurriedly.

James Reed:

Is it you actually who having spare time in that case spend it whole day by watching television programs or just telling lies on the bed? Do you need something new? This Teaching, Learning and Research in Higher Education: A Critical Approach can be the solution, oh how comes? It's a book you know. You are consequently out of date, spending your time by reading in this brand-new era is common not a nerd activity. So what these textbooks have than the others?

John Hawkins:

What is your hobby? Have you heard in which question when you got pupils? We believe that that issue was given by teacher for their students. Many kinds of hobby, Everyone has different hobby. And you also know that little person just like reading or as studying become their hobby. You have to know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your own personal teacher or lecturer. You get good news or update in relation to something by book. Many kinds of books that can you go onto be your object. One of them is this Teaching, Learning and Research in Higher Education: A Critical Approach.
