Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes)

By Emilio Soria Olivas, Jose David Martin Guerrero, Marcelino Martinez Sober, Jose Rafael Magdalena Benedito, Antonio Jose Serrano Lopez

The machine learning approach provides a useful tool when the amount of data is very large and a model is not available to explain the generation and relation of the data set. **The Handbook of Research on Machine Learning Applications and Trends: Algorithms, Methods, and Techniques** provides a set of practical applications for solving problems and applying various techniques in automatic data extraction and setting. A defining collection of field advancements, this Handbook of Research fills the gap between theory and practice, providing a strong reference for academicians, researchers, and practitioners.

Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) By Emilio Soria Olivas, Jose David Martin Guerrero, Marcelino Martinez Sober, Jose Rafael Magdalena Benedito, Antonio Jose Serrano Lopez Bibliography

- Sales Rank: #7504164 in Books
- Brand: Brand: Information Science Reference
- Published on: 2009-09-04
- Original language: English
- Number of items: 2
- Dimensions: 11.25" h x 8.50" w x 2.50" l, 3.58 pounds
- Binding: Hardcover
- 834 pages

Editorial Review

About the Author

Emilio Soria received an MS degree in physics (1992) and a PhD degree (1997) in electronics engineering from the Universitat de Valencia (Spain). He has been an assistant professor at the University of Valencia since 1997. His research is centered mainly in the analysis and applications of adaptive and neural systems.

Jose David Martin-Guerrero received a BS degree in physics (1997), a BS degree in electronics engineering (1999), an MS degree in electronic engineering (2001) and a PhD degree in electronic engineering (2004) from the University of Valencia (Spain). He is currently an assistant professor in the Department of Electronic Engineering, University of Valencia. His research interests include machine learning algorithms and their potential real application. Lately, his research has been especially focused on the study of reinforcement learning algorithms.

Marcelino Martinez received his BS and PhD degrees in physics (1992 and 2000, respectively) from the Universitat de Valencia (Spain). Since 1994 he has been with the Digital Signal Processing Group in the Department of Electronics Engineering. He is currently an Assistant Professor. He has worked on several industrial projects with private companies (in the areas such as industrial control, real-time signal processing, and digital control) and with public funds (in the areas of foetal electrocardiography and ventricular fibrillation). His research interests include real time signal processing, digital control using DSP, and biomedical signal processing.

Rafael Magdalena received an MS and PhD degree in physics from the University of Valencia (Spain, 1991 and 2000 respectively). He has also been a lecturer with the Politechnic University of Valencia, a funded researcher with the research association in optics and has held industrial positions with several electromedicine and IT companies. Currently, he is a labour lecturer in electronic engineering with the University of Valencia (since 1998).

Antonio J. Serrano received a BS degree in physics (1996), an MS degree in physics (1998) and a PhD degree in electronics engineering (2002) from the University of Valencia. He is currently an associate professor in the electronics engineering department at the same university. His research interest is machine learning methods for biomedical signal processing.

Users Review

From reader reviews:

William Manwaring:

What do you think about book? It is just for students since they're still students or the item for all people in the world, the actual best subject for that? Merely you can be answered for that concern above. Every person has several personality and hobby for every other. Don't to be pressured someone or something that they don't need do that. You must know how great as well as important the book Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes). All type of book is it possible to see on many options. You can look for the internet sources or other social media.

Frances Sitz:

Do you among people who can't read enjoyable if the sentence chained within the straightway, hold on guys this kind of aren't like that. This Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) book is readable through you who hate the straight word style. You will find the information here are arrange for enjoyable examining experience without leaving even decrease the knowledge that want to offer to you. The writer regarding Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) content conveys prospect easily to understand by most people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you continue to thinking Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) is not loveable to be your top record reading book?

Jason Valladares:

Information is provisions for those to get better life, information presently can get by anyone on everywhere. The information can be a information or any news even a huge concern. What people must be consider when those information which is from the former life are challenging be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you get the unstable resource then you understand it as your main information it will have huge disadvantage for you. All those possibilities will not happen inside you if you take Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) as the daily resource information.

Connie Nixon:

Beside this specific Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) in your phone, it could give you a way to get nearer to the new knowledge or facts. The information and the knowledge you are going to got here is fresh from oven so don't possibly be worry if you feel like an older people live in narrow town. It is good thing to have Handbook Of Research On Machine Learning Applications and Trends: Algorithms, Methods and Techniques (2 Volumes) because this book offers to you readable information. Do you oftentimes have book but you rarely get what it's interesting features of. Oh come on, that will not happen if you have this in the hand. The Enjoyable agreement here cannot be questionable, similar to treasuring beautiful island. Use you still want to miss the item? Find this book and read it from at this point!
