Motor Control: Translating Research into Clinical Practice By Anne Shumway-Cook PT PhD FAPTA, Marjorie H. Woollacott PhD

Motor Control is the only text to bridge the gap between current motor control research and its applications to clinical practice. The text prepares therapists to examine and treat patients with problems related to balance, mobility, and upper extremity function, based on the best available evidence supporting clinical practice. This edition provides the latest research findings and their clinical applications in postural control, mobility, and upper extremity function. Drawings, charts, tables, and photographs are also included to clarify postural control and functional mobility, and laboratory activities and case studies are provided to reinforce key concepts.

Videos on the back-of-book DVD examine motor control deficits, including deficits in postural control, mobility, and upper extremity function in different types of neurologic pathology (stroke, cerebellar pathology, cerebral palsy, and Parkinson's disease) as well as in balance impaired elders. These videos can be viewed in their entirety or in the following segments: impairments, postural control, mobility, and upper extremity control. This video enhances the clinical coverage found in the textbook.

Editorial Review

Users Review

From reader reviews:

Glen Hoffman:

Spent a free time and energy to be fun activity to do! A lot of people spent their down time with their family, or all their friends. Usually they doing activity like watching television, likely to beach, or picnic inside the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Could be reading a book is usually option to fill your totally free time/ holiday. The first thing that you ask may be what kinds of guide that you should read. If you want to try out look for book, may be the e-book untitled Motor Control: Translating Research into Clinical Practice can be great book to read. May be it might be best activity to you.

Jaclyn Davis:

Many people spending their period by playing outside having friends, fun activity together with family or just watching TV all day long. You can have new activity to shell out your whole day by reading a book. Ugh, do you consider reading a book can really hard because you have to take the book everywhere? It ok you can have the e-book, having everywhere you want in your Smart phone. Like Motor Control: Translating Research into Clinical Practice which is finding the e-book version. So , why not try out this book? Let's notice.

Peter Wright:

Is it you actually who having spare time and then spend it whole day through watching television programs or just telling lies on the bed? Do you need something totally new? This Motor Control: Translating Research into Clinical Practice can be the answer, oh how comes? A book you know. You are therefore out of date, spending your extra time by reading in this brand-new era is common not a nerd activity. So what these books have than the others?

Alice Myers:

A lot of guide has printed but it differs from the others. You can get it by web on social media. You can choose the most effective book for you, science, amusing, novel, or whatever by simply searching from it. It is known as of book Motor Control: Translating Research into Clinical Practice. You'll be able to your knowledge by it. Without causing the printed book, it can add your knowledge and make an individual happier to read. It is most essential that, you must aware about e-book. It can bring you from one location to other place.
