Local Fields (London Mathematical Society Student Texts) By J. W. S. Cassels

The p -adic numbers, the earliest of local fields, were introduced by Hensel some 70 years ago as a natural tool in algebra number theory. Today the use of this and other local fields pervades much of mathematics, yet these simple and natural concepts, which often provide remarkably easy solutions to complex problems, are not as familiar as they should be. This book, based on postgraduate lectures at Cambridge, is meant to rectify this situation by providing a fairly elementary and self-contained introduction to local fields. After a general introduction, attention centres on the p -adic numbers and their use in number theory. There follow chapters on algebraic number theory, diophantine equations and on the analysis of a p -adic variable. This book will appeal to undergraduates, and even amateurs, interested in number theory, as well as to graduate students.

Editorial Review

Users Review

From reader reviews:

Jennifer Phinney:

This Local Fields (London Mathematical Society Student Texts) are usually reliable for you who want to certainly be a successful person, why. The reason why of this Local Fields (London Mathematical Society Student Texts) can be one of several great books you must have is actually giving you more than just simple looking at food but feed a person with information that possibly will shock your earlier knowledge. This book is usually handy, you can bring it almost everywhere and whenever your conditions in e-book and printed people. Beside that this Local Fields (London Mathematical Society Student Texts) giving you an enormous of experience such as rich vocabulary, giving you tryout of critical thinking that we know it useful in your day action. So , let's have it and luxuriate in reading.

Jeffrey Haller:

Spent a free time and energy to be fun activity to do! A lot of people spent their spare time with their family, or their particular friends. Usually they carrying out activity like watching television, about to beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Might be reading a book is usually option to fill your cost-free time/ holiday. The first thing you ask may be what kinds of book that you should read. If you want to attempt look for book, may be the publication untitled Local Fields (London Mathematical Society Student Texts) can be great book to read. May be it can be best activity to you.

Daniel Campbell:

A lot of people always spent their own free time to vacation as well as go to the outside with them family members or their friend. Were you aware? Many a lot of people spent these people free time just watching TV, or even playing video games all day long. If you would like try to find a new activity this is look different you can read a new book. It is really fun in your case. If you enjoy the book you read you can spent the whole day to reading a e-book. The book Local Fields (London Mathematical Society Student Texts) it is quite good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. When you did not have enough space to bring this book you can buy the e-book. You can m0ore easily to read this book from your smart phone. The price is not to fund but this book offers high quality.

Josette Leonard:

What is your hobby? Have you heard that will question when you got learners? We believe that that query

was given by teacher for their students. Many kinds of hobby, Every person has different hobby. Therefore you know that little person such as reading or as looking at become their hobby. You must know that reading is very important and book as to be the thing. Book is important thing to increase you knowledge, except your current teacher or lecturer. You discover good news or update in relation to something by book. Many kinds of books that can you take to be your object. One of them is Local Fields (London Mathematical Society Student Texts).
