Quantitative Forecasting Methods (The Duxbury series in statistics and decision sciences) By Nicholas R. Farnum, Laverne W. Staton

This text is designed for practitioners and students of applied statistical forecasting. It is suitable for both the undergraduate or graduate business student. The text presents structured, detailed discussions of the concepts, and step-by-step procedures for using current forecasting methods. It is assumed that the reader has a knowledge of basic algebra and statistics. The text organizes the study of forecasting by using the classical trend, seasonal, and cycle approach to differentiate between the methods presented. Each chapter is organized with an overview, illustrations of concepts, decision factors in using the particular technique, model fitting and forecasting, and diagnostic testing. Several forecasting methods are covered such as exponential smoothing, leading indicator, business cycle, adaptive forecasting, time series application of regression analysis, and relevant government time series techniques.

Editorial Review

Users Review

From reader reviews:

Julie Flanagan:

Have you spare time for just a day? What do you do when you have much more or little spare time? Yeah, you can choose the suitable activity with regard to spend your time. Any person spent their very own spare time to take a move, shopping, or went to typically the Mall. How about open as well as read a book titled Quantitative Forecasting Methods (The Duxbury series in statistics and decision sciences)? Maybe it is for being best activity for you. You realize beside you can spend your time using your favorite's book, you can better than before. Do you agree with the opinion or you have different opinion?

Antonia Parham:

What do you think of book? It is just for students as they are still students or that for all people in the world, what the best subject for that? Merely you can be answered for that question above. Every person has several personality and hobby per other. Don't to be pressured someone or something that they don't wish do that. You must know how great as well as important the book Quantitative Forecasting Methods (The Duxbury series in statistics and decision sciences). All type of book could you see on many sources. You can look for the internet sources or other social media.

Megan Lapointe:

Your reading sixth sense will not betray anyone, why because this Quantitative Forecasting Methods (The Duxbury series in statistics and decision sciences) reserve written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written in good manner for you, leaking every ideas and producing skill only for eliminate your current hunger then you still skepticism Quantitative Forecasting Methods (The Duxbury series in statistics and decision sciences) as good book not merely by the cover but also through the content. This is one e-book that can break don't determine book by its cover, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your studying sixth sense already alerted you so why you have to listening to another sixth sense.

Richard Horgan:

With this era which is the greater individual or who has ability to do something more are more important than other. Do you want to become among it? It is just simple solution to have that. What you need to do is just spending your time very little but quite enough to experience a look at some books. Among the books in the top record in your reading list will be Quantitative Forecasting Methods (The Duxbury series in statistics

and decision sciences). This book that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking right up and review this reserve you can get many advantages.
